MIKE STRAIN DVM, COMMISSIONER

## HAVE YOU GONE CERTIFIED?

In the last issue, we introduced you to the Louisiana Department of Agriculture and Forestry's latest storytelling series - Crawfish Tales with Commissioner Mike Strain, D.V.M. In this series, Commissioner Strain will bring you stories from the field of Certified Louisiana companies, products, and the amazing people that have joined the Certified Louisiana program. In case you missed it, you can watch it on the [LDAF YouTube channel](#). Be sure to subscribe so that you don't miss the next one.

Crawfish Tales highlights what the Certified Program is all about...the wonderful people of Louisiana and the quality products they produce. It is important to meet your local

small business owners, farmers, and ranchers so you know exactly who you are supporting when you

buy Certified. The program also reminds us that when we shop Certified we are getting some of the most unique, flavorful ingredients in the world.

The Certified Program includes Certified Louisiana, Certified Cajun, Certified Creole, Certified Craft Beverage, and Certified Farm to Table. The logo program was established by the Louisiana Department of Agriculture and Forestry in accordance with RS 3:4721 for the promotion of Louisiana-made, grown, manufactured, or processed products that are aimed

at enhancing and promoting Louisiana's agricultural industry. The logo aids in marketing these products to consumers for farmers, processors, producers, and suppliers alike. With the recognition of the Certified logos, buyers can help support their local home-grown companies.

Why keep it local?

- Every dollar spent on Certified Louisiana products circulates more than five times in your local economy.
- Local businesses generate \$68 of local economic return for every

\$100 spent while spending \$100 at a national chain generates only \$43 of local economic return.

- Small businesses, which are almost exclusively locally-owned, employ 54% of Louisiana employees.
- Small local businesses contribute five times as much to nonprofit organizations and community causes as large businesses.
- Local businesses hire other local businesses for everything from marketing to accounting, legal work to various suppliers.

"Louisiana is like one big family. We all want to know and support each other. For many people it is important to know where their food comes from, but they also genuinely want to support local agricultural producers and locally owned businesses," said LDAF Commissioner Mike Strain, D.V.M.

If you are a locally owned business owner, consider becoming "Certified." In order for a product to be eligible for inclusion in the Certified Louisiana logo program, the product must be made, grown, manufactured, or processed in Louisiana. **See CERTIFIED, page 23**

Two men arrested for theft of livestock in St Landry Parish

**Baton Rouge** - Two men were arrested on January 19 by Livestock Brand Inspectors regarding two separate investigations involving theft of livestock in St. Landry Parish.

Forty-nine-year-old Ray A. Dunbar, 1744 School Road, Opelousas, La., was arrested in St. Landry Parish on a warrant for theft of livestock in St. Landry Parish following an investigation by the Louisiana Department of Agriculture and Forestry (LDAF) Livestock Brand Commission. During the investigation, it was determined that Dunbar received two head of livestock and failed to render proper payment to a local livestock market as required by law. The alleged theft occurred on or about Oct. 12, 2021.

Additionally, forty-six-year-old Carlos J. Allen, 2704 Grand Point Hwy, Breaux Bridge, La. was arrested in St. Martin Parish on a warrant from St. Landry Parish following an investigation by the LDAF Livestock Brand Commission. During the investigation, it was determined that Allen received seven head of livestock and failed to render proper payment to a local livestock market as required by law. The alleged theft occurred on or about Sept. 28, 2021.

The acquisition of the livestock and failure to render proper payment is a violation of R.S.14:67.1 (Theft of Livestock.) LDAF Commissioner Mike Strain, D.V.M., said, "The law is specific when dealing with the purchase of livestock. The failure or refusal to pay for livestock acquired is a crime and a violation of the theft of livestock statute."

The Livestock Brand Commission was assisted in this investigation by St. Landry and St. Martin Parish Sheriff's Departments.

At this time, a bond amount has not been set, and the livestock have not been recovered.

## TOOKOO’S SHRIMP OKRA GUMBO

Submitted by TJ’s Specialty Products

**Ingredients:**

- 3 pounds okra, finely chopped
- ⅓ cup vegetable oil
- 2 pounds shrimp, peeled
- 2 ½ quarts shrimp stock
- 3 onions, diced
- 1 tablespoon parsley
- 1 tablespoon onion tops, minced
- 1 tablespoon bell pepper, minced
- 1 teaspoon T.J.’s Cajun Filé
- T.J.’s Dry Rub Seasoning to taste

**Instructions:**

Put chopped okra, bell pepper, and 2 onions in black iron pot with the oil and cook uncovered over a medium fire until the okra browns and is no longer slimy; this takes a long time about 45 minutes and requires frequent stirring to prevent the browned residue from scorching and burning. The browned residue is the caramelized sugars from the onions and okra that give this dish much of its flavor. Head and peel shrimp, placing heads and shells in a pot of boiling lightly seasoned water with the remainder of the chopped onions. Boil for about 20 minutes. Strain shrimp stock and discard shells, heads, and onions while reserving the stock. Season shrimp with Tom’s Dry Rub Seasoning or Salt and Pepper. Set aside. Add the shrimp stock to the okra and onions and cook for about 1 hour on a medium fire. Add shrimp about 20 minutes before serving, simmering over a low fire. Add minced parsley and onion tops about 5 minutes prior to serving. Serve with steamed rice with some of T. J.’s Cajun Filé sprinkled on top for that finishing touch.

# Louisiana FFA Members Receive New FFA Jackets through the Margaret Mayeux Blue Jacket Program

BATON ROUGE, La. (Tuesday, January 4, 2022, Louisiana FFA Association) – Louisiana FFA members around the state are receiving some special deliveries this month. Since 2014, Mr. Kipp and Dr. Jennalyn Mayeux, son and daughter-in-law of the late Dr. Ronald and Mrs. Margaret Mayeux, have generously provided funding for over 20 new FFA jackets each year.

The program is named in honor of Mrs. Mayeux who led a life of service and greatly supported FFA members throughout her life. Dr. Mayeux served as an ag teacher and FFA advisor at Hessmer High School, superintendent of the Avoyelles Parish School System, and as State FFA Executive Secretary.

Kipp Mayeux says, “We are grateful for the opportunity to enhance the FFA experience for each Margaret Mayeux Blue Jacket award winner. The leadership team of Louisiana FFA continues to excel in assisting us with honoring the memory of our mom, while making a meaningful impact for deserving members.”

FFA members who do not own a

jacket can complete an essay describing what the FFA means to them and how owning a corduroy jacket would help them continue being an active FFA member. The applications are then reviewed by the Mayeux family, and State FFA Officers personally deliver the jackets to members at their schools.

## Roots, Shoots, Fruits & Flowers: Looking to the Spring

By Keith Hawkins, LSU AgCenter Extension Agent

Roots, Shoots, Fruits & Flowers' reader, Erin, is already looking forward to growing spring vegetables and sent in the question, "How can I stop mildew in cucumbers and squash leaves that stunts their growth?"

**Downy mildew on cucumber. Photo: Dr. Don Ferrin, LSU AgCenter.**

Dr. Don Ferrin of the LSU AgCenter wrote in a publication, "Downy Mildew of Cucurbits," about treatments. "Disease control relies primarily on the use of fungicides since resistant varieties are available only for cucumbers and some melons (but not watermelons). Fungicides are most effective when they are applied before the onset of disease, and they must be applied repeatedly if environmental conditions are suitable for disease development. Because this pathogen can develop resistance to fungicides quite readily, it is important to follow label instructions regarding their use," said Ferrin.

AHA examined the AgCenter's "**Disease Management Guide**" for fungicides suitable for mildew control:

- Bonide Fung-onil Multi-purpose Fungicide
  - Ferti-lome Broad Spectrum Landscape & Garden Fungicide
  - GardenTech Daconil® Fungicide
  - Hi-Yield Vegetable, Flower, Fruit and Ornamental Fungicide
  - Scotts Ortho® MAX® Garden Disease Control
- Here are some copper fungicides:
- Bonide Copper Dust
  - Bonide Garden Dust (also contains an insecticide)
  - Bonide Liquid Copper Fungicide
  - Bonide Dragoon Dust with Copper
  - Concern Copper Soap Fungicide
  - Liqui-Cop Copper Fungicide Garden Spray
  - Natural Guard Copper Soap Fungicide
  - SA-50 Southern Ag Liquid Copper Fungicide

Copper fungicides can be used for organic gardening but should not be mixed with liquid fertilizers. Another caution regarding copper fungicides is to avoid water with a pH less than 6.5 or the copper treatment will be less effective. Finally, copper fungicides can stain masonry and concrete.

Good luck with those Spring veggies, Erin.

Homeowners may be seeing stringy algae growing in their garden ponds this winter. Dr. Greg Lutz, a fisheries and pond specialist with the AgCenter, makes these useful comments, "Filamentous, slimy algae gets started on the pond bottom during the winter months when the water is clear, then grows into big clumps as the water warms up. The unusually cold weather we have been having has caused many ponds to get very clear, and this creates ideal conditions for the filamentous algae as the winter progresses."

**Filamentous algae. Photo: [aquaplant.tamu.edu](http://aquaplant.tamu.edu).**

The best approach in terms of cost, labor, and effectiveness is to use copper sulfate crystals to limit the growth of the filamentous algae. This product is available at most big feed and seed stores or farm co-ops. Tell your clientele to observe a limit of no more than 5 pounds of crystals per acre, per treatment. The crystals should be sprinkled or broadcast directly onto the clumps of filamentous algae - a little goes a long way. When roughly 5 pounds per acre (that would be 2.5 pounds in a half-acre pond, 10 pounds in a 2-acre pond, etc.) have been applied - even if only 1/4 or 1/3 of the algae in the pond has been treated, no more copper sulfate should be applied. After 8 days another treatment with the same number of crystals can be applied. There is usually little or no fish mortality when people stick to this strategy, but clientele should be made aware that there is always some risk of killing fish when treating aquatic vegetation. Are there more efficient ways of dealing with filamentous algae? In some cases, there probably are, but I have found over the years that it's better to have folks knock this stuff back gradually rather than hit it hard and become upset when they kill some fish."

The AgCenter has a downloadable publication entitled, *Management of Recreational and Farm Ponds in Louisiana*, and this publication is a handy reference for any landowner with a pond.

If you want to contact Roots, Shoots, Fruits and Flowers, please send your questions and pictures to Keith Hawkins, Area Horticulture Agent (AHA), 318-264-2448 or [khawkins@agcenter.lsu.edu](mailto:khawkins@agcenter.lsu.edu). Also, please share the name of your parish.
